(Includes Adaptive Cruise)
Installation Instructions

Attachment Tab Height: 21”
Attachment Tab Width: 37-1/2”

Please read BOTH these Installation Instructions and the General Information sheet prior to installing or operating this equipment.

1. Blue Ox® towing products and accessories are intended to be installed by Blue Ox® Dealers who are familiar with our products and have the equipment and knowledge necessary to do “fit work”. If needed, Blue Ox® Dealers can be found at www.blueox.com or by contacting our Technical Service Department at (402) 385-3051.

2. Many Blue Ox® baseplates are designed to use existing holes and hardware to mount the baseplate to the towed vehicle. Even though bolts are there, do not assume they are adequate for baseplate mounting. Always use the hardware supplied in the hardware kit and existing hardware as specified in the installation instructions.

Bolt Torque Specifications
Torque in Foot-Pounds for Metric Bolts

If the front of your vehicle looks different than this, please contact us at (402)385-3051.

Reference your vehicle owner’s manual for manufacturer’s towing specifications.

**WARNING**

Failure to read and follow these instructions could result in separation of the towed vehicle from the tow bar, causing property damage, loss of towed vehicle, personal injury or death.
Instruction Notes: The fascia cover and fascia are removed and reinstalled for the baseplate installation. The tow hooks are removed and not reinstalled. Some drilling and trimming is required.

Place all components that are removed on a flat, sturdy surface. All items will be reinstalled unless otherwise noted after the baseplate is installed.

The dimensional variations between otherwise identical vehicles can be considerable. While the baseplate was designed for easy installation, it may be necessary to tailor the baseplate slightly to compensate for vehicle manufacturer’s tolerances.

The BX8848 4-Diode Wiring Kit is recommended for the 2014 Trailhawk.

Fitment Note: Baseplates with the manufacturing date prior to 11/13/15 will not fit 2016 models. Baseplates made from this date forward will fit all years.

NOTICE

• Handling of some cosmetic parts when installing this product may require the use of protective covers, rags, specialty tools, etc. to prevent damage.

• When using power drills be aware of the dangers of torque and drill bit length.

• When using a reciprocating saw be aware of objects behind the cutting surface.

• Use a good quality paint to spray cut edges of frame to prevent rusting.

• Be sure that ALL electrical connections are plugged in and accessories are functioning properly before reinstalling the fascia.

• The baseplate is computer tested to your vehicle’s GVWR, exceeding this weight will void the manufacturer’s warranty.

• Be sure to use a sufficient amount of Loctite® Red on all bolt threads before tightening. Tighten all bolts according to the torque chart provided.

• Dealer or installer be certain the user receives these instruction sheets.

• If the baseplate is in an accident, it must be replaced. DO NOT use it again! An accident can cause unseen damage and using it again could result in more damage or serious injury. DO NOT use the baseplate if it is damaged or missing parts.
**Tools Required**
- Flat Screwdriver
- Utility Knife
- Torque Wrench
- Reciprocating Saw
- Tape Measure
- Loctite® RED
- 8MM Socket
- 10MM Socket
- 15MM Socket
- 16MM Socket
- 17MM Socket
- 30MM Socket

**Important:**
Use only genuine factory replacement parts on your baseplate. Do **NOT** substitute homemade or non-typical parts. If a bolt is lost or in need of replacement, for your safety and the preservation of your baseplate, be sure to use a replacement bolt of the same grade (In most cases it will be Grade 5, please reference the parts list above). Replacement parts may be ordered through your nearest Blue Ox® Dealer or Distributor. Failing to follow and/or altering these installation instructions in either installation or required equipment will void the manufacturer’s warranty. Towing behind a non-motorized vehicle will void the warranty.
1. Remove the twelve (12) push pins from the top edge of the fascia cover and set aside.

2. Using a 10MM socket, remove the three (3) screws from the backside of the fascia next to the fender. There are two (2) in the corner and one (1) directly below the bracket (inset). Do this on both sides of the vehicle.

3. Using a 8MM socket, remove the three (3) screws from the edge of the wheel well. Pull back the wheel well cover, using a 10MM socket, remove the screw behind the trim (inset). Do this on both sides of the vehicle.

4. Remove the two (2) rivets from the underside corners of the fascia (inset). There is one (1) on each side. Using a 10MM socket, remove the four (4) screws from the middle portion of the fascia. There are two (2) on each side.
5. Lift the corners of the fascia up towards the fender (white) and out to release (gray). Continue along under the headlights unsnapping the fascia from the vehicle. Set the fascia aside.

6. Using a 16MM socket, remove the two (2) bolts from the underside of the tow hook (white). Using a 30MM socket, remove the nut from the backside of the tow hook and remove from the vehicle (inset). Do this on both sides of the vehicle.

7. Using a 15MM socket, remove the three (3) bolts from the frame extension and two (2) bolts from the bottom side of the bumper (white). Using a 10MM socket, remove the nut from the fascia extension (gray). Do this on both sides of the vehicle. The extensions will not be reinstalled.

8. Trim the lower lip off the bottom of the bumper so that it is flush with the face for baseplate clearance. Do this on both sides of the vehicle.
9. Loosely bolt the bumper attachment plate to the underside of the bumper with the 10MM hardware. Only install loctite onto the inner bolt (white) and fully tighten. Once the inner bolt is tightened, remove the outer bolt (gray) until the baseplate is installed. Do this on both sides of the vehicle.

10. Install the baseplate to the vehicle using the three (3) existing extension bolts (white). Install 10MM-1.25 x 40MM bolts with 3/8” flat washers and 10MM lock washers into the lower bumper bolts (gray). Fully tighten all fasteners. Do this on both sides of the vehicle.

Note: On the passenger side only, the existing nut will need to be removed for baseplate clearance (black).

** Use Loctite® Red on all bolt threads and tighten all bolts to the appropriate torque.

11. Reinstall the outer bumper attachment plate bolt (white). Install the 1/2” hardware on the inside edge of the plate (gray). Fully tighten all fasteners. Do this on both sides of the vehicle.

** Use Loctite® Red on all bolt threads and tighten all bolts to the appropriate torque.
12. Attach the permanent baseplate safety cables to the provided convenience link on the baseplate. The photo above shows the recommended installation of the cables to frame of vehicle. Additional options may interfere with suggested mounting; in this case, secure the cables to a solid piece of the frame as described in the General Information sheet. Be sure the safety cables do not rub against any hoses or moving parts. Do this on BOTH sides of the vehicle.

13. **Optional:** If installing a breakaway, screw the breakaway bracket to the bumper at the desired location with the #10-16 x 1” self drilling screw. Attach the breakaway to the bracket with a 1/4"-20 x 3/4” bolt and 1/4"-20 lock nut.

14. Trim the fascia opening as shown for clearance around the baseplate. Do this on both sides of the fascia.
15. Reinstall the fascia and fascia cover.

16. Install the new plastic rivets into the underside of the fascia, where the factory rivets were removed.

CUSTOMER SERVICE COMMITMENT

Blue Ox® is committed to providing you with exceptional customer care throughout your lifetime with our products. Our team is here to assist you with any questions you may have regarding the performance of your product. Simply call (402) 385-3051 and you can speak with our technical service team.

Additionally, please visit our website to see which rallies our Destination America team will be attending. For a nominal fee, our service technician will service your towing system to ensure it’s in proper working condition. Also, as a commitment to our customers, should you visit our factory, you can stay at our full service Blue Ox® campground at no charge along with enjoying a factory tour.

Again, thank you for being our customer and for the confidence you have shown in the performance of our products. It is because of customers like you we enjoy the success we have today.
Permanent Baseplate Safety Cable Installation

1. Permanent baseplate safety cables are strongly recommended when towing a vehicle with a tow bar. The principle function of the permanent baseplate safety cables is to prevent the towed vehicle from breaking loose in the event the connection between the frame of the towed vehicle and the baseplate fails or becomes disconnected. The cables must be connected from the baseplate to the frame rail or cross member of the vehicle's frame. The illustrations below show the possible arrangements recommended by Blue Ox®. Each permanent baseplate safety cable must have an adequate weight rating for the towing system. The weight rating of the two (2) cables together will not qualify.

2. Do not mount the permanent baseplate safety cables against wires, hoses or brake lines.

3. These permanent baseplate safety cables should remain installed as long as the baseplate is installed on the vehicle. Permanent baseplate safety cables are to be used in conjunction with, and NOT a replacement for legally required safety cables attaching the towed vehicle to the towing vehicle.

Notice To Baseplate Installer

1. It is YOUR responsibility to watch for:
   - Oil cooler and air conditioner lines
   - Electrical wires and hoses
   - Missing parts or attaching points on the frame

   ** If the baseplate is improperly installed and is against a wire or hose, it could cause fluid leaks or electrical shorts some time after the actual baseplate installation.

Permanent Baseplate Safety Cable Installation

Permanent baseplate safety cables are strongly recommended when towing a vehicle with a tow bar. The principle function of the permanent baseplate safety cables is to prevent the towed vehicle from breaking loose in the event the connection between the frame of the towed vehicle and the baseplate fails or becomes disconnected. The cables must be connected from the baseplate to the frame rail or cross member of the vehicle's frame. The illustrations below show the possible arrangements recommended by Blue Ox®. Each permanent baseplate safety cable must have an adequate weight rating for the towing system. The weight rating of the two (2) cables together will not qualify.

Do not mount the permanent baseplate safety cables against wires, hoses or brake lines.

These permanent baseplate safety cables should remain installed as long as the baseplate is installed on the vehicle. Permanent baseplate safety cables are to be used in conjunction with, and NOT a replacement for legally required safety cables attaching the towed vehicle to the towing vehicle.

General Information

1. Ensure that your product(s) are registered online at www.blueox.com. It is crucial to register your product(s) so that you may be alerted of product offerings, updates, upgrades, maintenance and safety bulletins, and/or recalls.

2. It is the owner’s responsibility to inspect all towing equipment for cracked welds, missing or worn parts and loose bolts before each towing trip. Be sure to use Loctite® Red on all bolts and tighten to the recommended specifications.

3. It is the owner’s responsibility to hook up all towing equipment per manufacturer's instructions/recommendations.

4. Remove the attachment tabs when not in use (if applicable).
BLUE OX ORIGINAL PURCHASERS
THREE YEAR LIMITED WARRANTY

Automatic Equipment Manufacturing Company ("Automatic") warrants to the original (first) retail purchaser that this product, manufactured by Automatic, shall be free from defect in material and workmanship under normal use and service for a period of three years from the date of delivery.

During said three-year period, Automatic will repair or replace any parts that have been returned by the original purchaser, to the factory, transportation prepaid, and in Automatic's sole and absolute opinion found to be defective.

Limitations on Warranty Coverage:

Coverage under this warranty will be valid only if the customer warranty card is returned by the original purchaser within 30 days of purchase.

Coverage under this warranty will be effective only when a copy of the original invoice, showing date and place of purchase, accompanies any claim for warranty. This warranty is NON TRANSFERABLE.

This limited warranty will not cover, in any way or form, any alleged damages caused by incorrect or improper installation, improper use, modification or neglect of product, failure to properly service and maintain, misuse, act of God, accident or failure of the user to follow guidelines contained in the instructional material provided by Automatic.

This warranty does not cover normal wear and tear, paint or rust.

Warrantor assumes no responsibility to the owner for loss of use of product, loss of time, inconvenience or any other damage consequential or otherwise. Including, but not limited to mileage, expense of transporting of product, return shipping expense, mechanics travel time, telephone, road service, towing, and rental during repairs, travel, lodging, loss or damage to personal property or loss of earnings.

REPAIR OR REPLACEMENT AS SET FORTH IN THIS LIMITED WARRANTY IS THE SOLE EXCLUSIVE REMEDY OF THE PURCHASER. AUTOMATIC SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THIS PRODUCT. EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THIS PRODUCT IS LIMITED IN LENGTH TO THE DURATION OF THIS WARRANTY.

Please visit http://blueox.com/warranty/ to register your warranty
